ABOUT ME

Full-stack web developer with 3+ years of professional experience building practical business applications using **Laravel, PHP, Vue.js, React.js, Next.js, REST APIs, MySQL** and **MongoDB**. Experienced in **ERP, CRM, SaaS, e-commerce, farm management** and **NGO branch management systems**. Strong in **backend architecture, database optimization, API integration**, responsive **UI development, debugging** and **production support**.

WORK EXPERIENCE

Web Application Developer

United Software Solutions | November 2022 to Present

- Developed and maintained **Laravel** applications, **REST APIs**, admin panels and business workflow modules.
- Built responsive interfaces using **Vue.js, React.js, Next.js, JavaScript, jQuery, AJAX, Axios** and **Bootstrap**.
- Designed database structures, optimized **MySQL** queries and improved application performance for real project use.
- Integrated third-party **APIs, payment/notification** flows and reusable **services/packages** where required.
- Worked with requirement **analysis, debugging, module planning, issue fixing** and **production-level feature updates**.

PROJECT EXPERIENCE

- **ERP System:** Business operation modules including inventory, purchase/sales workflow, reports, admin management and user access control.
- **CRM System:** Customer records, follow-up workflow, communication tracking, lead/customer lifecycle and dashboard-oriented management features.
- **SaaS Application:** Reusable modules, multi-user access, configurable business settings and scalable admin workflows for service-based applications.
- **E-commerce System:** Product catalog, category management, cart, checkout, order processing, customer/admin management and API/payment integration.
- **Farm Management System:** Agriculture workflow features with operational records, dashboards, monitoring views and reporting support.
- **NGO Branch Management System:** Branch records, user management, operational tracking, reports and centralized administrative control.

TECHNICAL SKILLS

- **Backend:** PHP, Laravel, REST API.
- **Frontend:** Vue.js, React.js, Next.js, JavaScript, jQuery, AJAX, Axios, HTML5, CSS3, Bootstrap 5 and Tailwind Css.
- **Database:** MySQL, MongoDB, relational data flow, query optimization and reporting support.
- **Integration:** third-party API integration, payment/notification flows and admin workflow modules.
- **Tools/UI:** Git, SCSS/Sass, Vite, responsive UI implementation, debugging and performance optimization.

OTHERS EXPERIENCE

Open Source Contributions

- Developed open-source NPM packages.
- Built reusable Laravel packages.

ACADEMIC DATA
